MO-2M Explosive Vapor Detector

Hand-held unit
~1 ft long, less than

- MO-2M hand-held vapor detector able to detect commercial or military explosives:
 - audible alarm
 - small screen displays explosive type and vapor concentration
- Project goal to improve and industrialize new smaller, lighter explosive detection technologies at a reduced cost
- Additional upgrades:
 - Integrate electric ion drive to eliminate contamination risk
 - Eliminate radioactive sources with new ionizing solution
 - Develop desktop variant of MO-2M based on current NLDM technology to screen documents
